

SMART TIME

TA & AC Solutions

We designed the STMS to meet the stringent requirements of every organization and firm.

Supports one shift or multi shifts time schema. Working time schedules with flexible time definitions, workdays & holidays are also supported

With The Smart Time Management System (STMS), employee time keeping and access control has never been easier

Smart Time is a complete access control and business time keeping solution for any modern organization.

Data can be collected through standard serial interfaces, modems or IP networks. The system can be administered from remote workstations through LAN or WAN.
